Ultralight Outdoor  
Essentials

# 05

## BUILDING OUR OWN GEAR

Was never part of the plan, it was simply a necessity if we wanted access to the tools we truly needed

What we do at A-NET-IK will always be simple. We're a diverse network of outdoor athletes collectively using lifetimes of firsthand experience to design products that thrive in hot weather and highly active settings. As both the daily end users and product developers, we consider it an absolute responsibility to only provide tools that help people solve problems and stay focused on what keeps them excited about life. Constant innovation, precise attention to detail, and valuable experience is what we look forward to sharing everyday. It's an honor to be along for the ride.

See ya out there.

Kirk Presley | Founder

# THE BIGGEST DIFFERENCE IS EVERYTHING

Products are carefully built with 3 critical principals that provide unmatched benefits across all outdoor pursuits.

## LIGHTER COOLER PERFORMANCE

Products are all we build. 365 days a year, that focus never changes.

## IF IT DOESN'T FIX A PROBLEM WE DON'T MAKE IT,

and never will. Every product is built out of necessity, to simply provide the best tool for the job.

## DESIGNED BY EXPERIENCE

Decades of firsthand outdoor experience will always be our most important design tool. Built by the people, for the people.
